

- Web search engines and sites (e.g., Google, Netcraft, and LinkedIn)
- WHOIS registries
- Accessible DNS servers

The majority of this probing is indirect, sending traffic to websites including Google, and public WHOIS and DNS servers. Two tactics involve sending traffic to the target network, however, as follows:

- Probing the target's own DNS servers
- Network probing via SMTP

Network Scanning

- Use of Nmap to perform initial network scanning
- Low-level assessment to understand the network configuration
- Use of Nmap and Metasploit to perform light vulnerability scanning
- Bulk vulnerability scanning (using Nessus, Qualys, and others)
- Evasion of intrusion detection and prevention mechanisms

If you have a legitimate interest in viewing the non-public WHOIS details, send your request and the reasons for your request to whoisrequest@markmonitor.com and specify the domain name in the subject line. We will review that request and may ask for supporting documentation and explanation.

The data in MarkMonitor's WHOIS database is provided for information purposes, and to assist persons in obtaining information about or related to a domain name's registration record. While MarkMonitor believes the data to be accurate, the data is provided "as is" with no guarantee or warranties regarding its accuracy.

By submitting a WHOIS query, you agree that you will use this data only for lawful purposes and that, under no circumstances will you use this data to:

- (1) allow, enable, or otherwise support the transmission by email, telephone, or facsimile of mass, unsolicited, commercial advertising, or spam; or
- (2) enable high volume, automated, or electronic processes that send queries, data, or email to MarkMonitor (or its systems) or the domain name contacts (or its systems).

MarkMonitor reserves the right to modify these terms at any time.

By submitting this query, you agree to abide by this policy.
